How it works

The Layer between intent & Action

• 01 / observe
Receipts for everything

Activity
09:14 Drafted Email
09:16 Asked before
is sent

Policy
Spend w/o Asking: UP to \$50
Public Post: Ask First

Defined 02 •
Your rules, in plain site

• 03 / choose

Action Requires Decision
Send to New Contact?
- The agent waits. Nothing goes until you say.
Approve Deny

Why?

Trust is not a
Setting!

We asked AI to write. Now we're asking it to **Act**.

Receipts for what happened
Rules for what may happen. **The Gate**
for what only you can decide.

An Answer can
be revised. An email
sent to the wrong
person can't be unsent.

A purchase can
cost more than price
on screen.

Blind trust is simple
until something goes
wrong. The answer isn't
complicated permissions
it's an understandable
record and a few boundaries
that hold.
